SUMMARY

Full-Stack Software Engineer with 4+ years of experience building and shipping production web and mobile applications with Python (Django, FastAPI, Flask) and JavaScript (React, React Native). Currently embedded with Big Health's engineering team on Sleepio, a clinically validated digital therapeutic available to 12M+ people. Experienced across the full development cycle: API design, databases, CI/CD, cloud (AWS), and production monitoring. Currently pursuing a graduate specialization in Cybersecurity (UNAULA).

PROFESSIONAL EXPERIENCE

Full-Stack Developer (embedded via Alternova) | Big Health — Sleepio *Feb 2024 – Present*

- Work directly with Big Health's engineering team on **Sleepio**, a clinically validated digital therapeutic for insomnia available to **12M+ people** through the UK's NHS and major US employers and health plans.
- Develop backend features and **GraphQL** services supporting personalized user journeys and platform stability at scale, where reliability directly impacts patients.
- Collaborate daily in English with a distributed US/UK team: code reviews, technical design, and estimation.

Full-Stack Software Engineer | Alternova Inc — US health & education clients *Jan 2023 – Present*

- Develop and maintain production features end-to-end (backend, frontend, and mobile) for **5+ client products** in digital health, education, and social impact, using **Python (Django, FastAPI)** and **React / React Native**.
- Contributed to **LetSync (UCSF)**, a clinical research mobile app for the University of California, San Francisco, implementing backend services and APIs for real-time data synchronization.
- Built scalable backend systems for **The Atom Program** (global education initiative) handling large volumes of user data, and secure data-management features for **The Connected Parent**.
- Built and integrated **REST and GraphQL APIs** with third-party services and automated recurring processes with **Celery and RabbitMQ** task pipelines.
- Monitor production systems with **Sentry, New Relic, Splunk, and Grafana**, triaging and resolving incidents in user-facing products.

Full-Stack Developer | GootWork *Mar 2022 – Jan 2023*

- Built and optimized internal web applications with **Vue.js, Node.js, and MongoDB**, cutting data processing time by **30%** and improving API response times by **40%**.
- Developed a library of **reusable UI components** adopted across projects, accelerating feature development.

PROJECTS

Thiup — Open-source anonymous social platform (Python/Django, React, PostgreSQL). Designed the privacy model, content feed, and moderation flows. Source on GitHub.

Vivaldi Math Solver — Open-source Android calculator that generates step-by-step solutions for algebra, calculus, trigonometry, and statistics. Published on Google Play.

Trak — Price-comparison app that scrapes and normalizes listings across Amazon, MercadoLibre, and eBay (Python, Scrapy, Selenium; React Native client). Published on Google Play.

TECHNICAL SKILLS

Languages: Python, JavaScript (ES6+), TypeScript, SQL

Backend: Django, FastAPI, Flask, Node.js, REST APIs, GraphQL, Microservices, Celery, RabbitMQ

Frontend & Mobile: React.js, React Native, Vue.js

Databases: PostgreSQL, MySQL, MongoDB, Supabase

Cloud & DevOps: AWS, Docker, Git, CI/CD

Observability: Sentry, New Relic, Splunk, Grafana

Testing & Other: Unit Testing, Web Scraping (Scrapy, Selenium, BeautifulSoup)

Spoken Languages: Spanish (native); English — professional working proficiency (B2), used daily with US/UK teams

EDUCATION

Specialization in Cybersecurity | Universidad Autónoma Latinoamericana (UNAULA) *2026 – Present*

B.S. in Computer Science (Ingeniería Informática) | Instituto Universitario de la Paz *2021 – 2026*
