

Mateo Jimenez

SOFTWARE ENGINEER

About me

Full-Stack Developer specializing in Python and JavaScript, with expertise in Django, FastAPI, Flask, React.js, and React Native. Focused on building scalable solutions and optimizing performance across frontend and backend. Committed to solving complex challenges with a practical, strategic, and results-driven approach.

Professional Experience

- Full-stack Developer** (Jan 2023 - Present)
Alternova Inc
My current responsibilities involve identifying and proactively resolving challenges to innovate and introduce new features into products. I specialize in using Python and Java to contribute to a wide range of projects, including:
 - [theconnectedparent.net](#) 🌐
 - [letsyncapp.ucsf.edu](#) 📱
 - [theatomprogram.com](#) 🌍
 - [comfama.com/red-de-amor/](#) 💕
 - [sleepio.com](#) 🧠

In these initiatives, I actively contribute to the entire development cycle, ensuring seamless integration and optimal performance. My role encompasses not only problem-solving but also a commitment to delivering solutions that enhance overall functionality and user satisfaction.

- Full-stack Developer** (Mar 2022 - Jan 2023)
GootWork
As a Full-Stack Developer, I built and optimized internal applications using Vue.js, Node.js, and MongoDB, improving efficiency and user experience.

I reduced processing time by 30%, improved response times by 40%, and developed reusable UI components for faster development. I also integrated third-party APIs to automate processes and collaborated with teams to align technical solutions with business needs.

Personal Projects

- thiup.com** — An open-source, anonymous, and secure social platform that allows users to share content, comment, and interact in a safe environment. Designed to promote privacy while fostering an active and engaged community. Source code available on GitHub
[View the project on GitHub](#)
- Vivaldi Math Solver** — An open-source calculator that delivers step-by-step solutions for algebra, calculus, trigonometry, and statistics. Built to make complex mathematics more accessible by providing clear and detailed explanations at every stage of the problem-solving process.
[View app in the Google play.](#)
- Trak** — An innovative application that compares prices across multiple online stores, including Amazon, MercadoLibre, and eBay. Designed with a user-friendly interface to help users find the best deals quickly and effortlessly.

Skills

Languages: Python, JavaScript, Java, SQL
Backend: Django, FastAPI, Flask, Node.js
Frontend: React.js, React Native, Vue.js
Databases: PostgreSQL, MySQL, MongoDB
DevOps & Tools: Git, Docker, AWS, CI/CD
Monitoring: Splunk, Sentry, Newrelic, Grafana
Other: REST APIs, GraphQL, Unit Testing, Microservices, Message queues (Celery, RabbitMQ), Web scraping (BeautifulSoup, Scrapy, Selenium),

Languages

English: Upper-Intermediate (B2) – Capable of professional communication in technical and collaborative environments

Education

Instituto Universitario de la Paz — Bachelor's in Computer Science (2022 – Present)
